Pre-workshop Setup – ORCID Onboarding

TCUP Hub Data Science Workshop

November 5–6, 2026

Please complete this before Day One, November 5

Why ORCID?

An ORCID iD is a free, permanent identifier that connects you with your research and scholarly contributions, including publications, datasets, and software. It helps distinguish you from people with similar names and stays with you when you change institutions. Your ORCID record can also hold information about your education, employment, and research activities. About ORCID

Keeping that record up to date can save time when preparing grant proposals. SciENcv is an online tool used to prepare biographical sketches and current and pending support documents for NSF and other federal agencies. After linking your ORCID account to My NCBI, which provides access to SciENcv, you can choose ORCID as a source when creating a document. SciENcv can then reuse information from your ORCID record and let you select relevant publications for your biosketch, reducing repeated typing. You'll still need to review the information, fill any gaps, and certify the finished document. SciENcv guidance.

NSF requires SciENcv for these proposal documents; its current guidance lists the ORCID iD itself as optional. Creating and maintaining an ORCID record is therefore useful preparation for future proposals. If you already have an ORCID iD, keep using that one. NSF proposal requirements

Registration is free. See the ORCID researcher FAQ.

1. Check whether you already have an iD

If you have used ORCID for a publication, grant or institutional profile, try signing in first. Use the sign-in page's account recovery options if needed. Keep the same iD rather than intentionally creating another record for a new institution or email address. Use the support route if you are unsure which existing account is yours.

2. Register if you do not have an iD

Open the official registration form. Enter your name and an email address you can access, create a password, and follow the remaining prompts. Read the terms and select your visibility preferences. Complete any required identity-of-user check. Keep your password private.

Use an email you expect to retain access to. ORCID recommends adding a backup email, particularly when the primary address belongs to an institution. Follow ORCID's registration guide if the form or prompts differ from these instructions.

3. Verify your email

Look for ORCID's welcome/verification message and follow its verification link. Check spam/junk if it does not arrive. If necessary, use the account's email settings or official support guidance to request verification again. Verification unlocks features such as manually adding record information. See ORCID's email verification guidance.

4. Find and keep your public iD link

In your ORCID record, locate the iD and copy its full link, beginning with `https://orcid.org/`, for your own reference. Open that link in a signed-out or private browser window to see the public record. You may share the link when an organizer, publisher or funder requests your identifier; do not share your password or sign-in verification messages.

An empty record does not mean registration failed. Adding biography, employment or publications is a separate activity, outside this onboarding draft.

5. Choose what information to share

Your ORCID iD is always public. Other record content has visibility controls: everyone, trusted parties or only me. Review these choices before adding details; you do not need to make your email, biography or affiliation public for this onboarding activity. See ORCID's visibility guidance.

If you get stuck

Remote support:

- Jason Tinant (jtinant@olc.edu),
- Brian Yandell (brian.yandell@wisc.edu),
- Nate Quarderer (nathan.quarderer@colorado.edu).

Use email to ask questions. Please allow a reasonable amount of time for a reply. If you have not heard back in a reasonable time, email another listed helper. Bring unresolved issues to Thursday's 8 a.m. breakfast help.

Keep your GitHub and ORCID passwords and verification codes private.

In-person help: Thursday, November 5, 8:00 a.m. breakfast help opportunity (San Antonio time).
